

DIGITAL TIMER - BATTERY POWER

A timer designed from the ground up for corrosive, acid, wet environments. Simple to use as a kitchen timer.

Counts down from the time you set and when you time elapses, a LOUD 103dB warbling buzzer sounds with flashing green button.

Push the green front button to silence the buzzer which automatically resets the time for the next cycle. Easy to set other times with the blue buttons.

- Many other modes are selectable in the field using jumpers located inside the box. (repeating, auto-off, guard-duty, etc)
- Lithium battery included typically lasts for years. (2-3 years for rather busy service conditions)
- Waterproof and suitable for wash down duty.
- Large 18mm digits visible from a distance.
- Optional magnetic mounting feet to securely stick the timer onto metal surfaces like oven doors.
- Two timing ranges: 100 minutes, or-100 hrs.

MODEL T4

Optional beacon LED strobes and is bright enough to be seen in daylight.

Optional model T7 has the time-setting buttons inside the box.

Ideal for repetitive timing.
